

# **LED MIDGET FLANGE**

## **T1-3/4 BI-POLAR LAMP 5-28 VOLTS**

### **SPECIFICATIONS**

**Lamp Shape: T1 3/4  
(5mm) Base Style: Midget  
Flange Length MOL: 0.65"  
Diameter MOD: 0.24"  
Electrical Options:  
Bi-Polar, CC+ or CC-**

### ***LED Advantages***

- **Up to 90% Energy Savings Over Incandescent Lamps**
- **Long Life, 100,000 hrs, over 10 years!**
- **Increased Safety, no glass that can shatter**
- **Reduced Re-lamping Labor Costs**
- **Shock and Vibration Proof**
- **Lower Operating Temperature**

### **Commonly Replaces Miniature Lamps:**

**# 328, 345, 350, 7335 (5/6V), 330, 382,  
394 (12/14V), 327, 376, 387 (24/28V)**

### **Color Availability:**

***Bright White* - will illuminate any  
colored lens**

***Also Available in Red, Green,  
Amber & Yellow***

This is a direct LED replacement for Midget Flanged Based miniature incandescent lamps.

These LEDs are ideal for mission critical applications such as power plant displays, industrial equipment, and elevator controls.

Long-life, low power consumption, shock resistance, and extreme thermal tolerance make LEDs ideal for harsh industrial environments.

***Low current consumption  
saves energy.***
